POTTED EVERGREENS

Evergreens in the following list have been field grown and potted into Keiding Art Pots. Much of our plants are dug with the Jiffy Balling machine and slipped into the proper size pot. The following series of pictures depict our operation.

After potting, plants are hauled into our lath houses for proper watering. Many of our plants are picked up at our nursery by customers trucks. However we have a delivery service (Delivery at Cost) in our specially Triple decked trucks to assure you delivery without breakage.

Our material can be moved and planted at any time of the year, thus extending planting season all summer.
